I have prepared this information kit to help couples understand what my services are, how it all works and what you will need to get your wedding organised.

If I havent already told you all my weddings are individually written. That means you have the security and understanding that your wedding service is going to be personalised. If you have something that you have written, I most welcome to bring it to the service, and with some creativity, understanding and unique delivery together we will have the most wonderful wedding ever.

Services

Packages

Every package no matter if small or large has the option to be tailored to your needs. Registry style weddings have a basic pre-written script which is designed for legal purposes, but each package from Small or Deluxe is personalised.

THE Difference

Sandy offers weddings that are different, here are her key points in a ceremony

Laugh

Create a moment when everyone in the room is part of your wedding

Cry

Everyone has the right to share a tear or joy, being it remembering family, or the wonders of the past.

Feel

Instead of waiting for the wedding to end, make people feel the moment that is happening.

Understand

There is no point having a service that people can't relate to, keep it in simple words, keep it engaging and make it something people understand.

Time

Allow yourself one calendar month prior to your wedding day to prepare the Noim (Notice of Intent to Marriage). The great news is as part of my services I do most of your paperwork electronically.
